

Meeting Minutes – 14 May 2026

Platform: Online (Teams)

Date: 14 May 2026

Time: 17:03

Attendees

- Phelelani
 - Shazmeen
 - Keanu
 - Yusra
 - Mika
-

Discussion Points

1. Payment System & Cash Payments

- Team discussed improving the checkout flow by introducing multiple payment options
 - Keanu was reminded to add:
 - Online payment option
 - Cash / pay-in-store option
 - Planned workflow:
 - Customer clicks checkout
 - Customer selects payment method
 - Online payments redirect to PayFast
 - Cash payments proceed directly to order placement
-

2. Customer & Vendor Profile Improvements

- Phelelani identified an issue where customer profile images could not be updated successfully
- Shazmeen agreed to investigate the issue

- Additional vendor-profile functionality discussed:
 - Vendor logos
 - Store slogans
 - Cuisine selections
 - “Other” cuisine option in dropdown menus
 - Team agreed cuisine classifications should support more flexibility for vendors
-

3. Navigation Bar Redesign Review

- Phelelani demonstrated the redesigned navigation/profile-dropdown system
 - Team reviewed:
 - Profile dropdown behavior
 - Role-based navigation visibility
 - Customer/vendor navigation differences
 - Logout/login handling
 - Team agreed the redesign significantly improved usability and modernized the platform
-

4. Role-Based Navigation Decisions

Customer Navigation

- Team agreed customers should primarily see:
 - Home
 - Browse/Menu
 - Orders
- Profile access would move into the profile dropdown icon

Vendor Navigation

- Vendors would primarily see:
 - Dashboard
 - Orders

- Store Settings
- Less frequently used actions would move into the dropdown menu

Admin Navigation

- Admin accounts would continue using a simplified navigation structure with default profile icons
-

5. Browse Page Naming Discussion

- Team debated whether “Browse” properly described the customer ordering page
 - Concern raised:
 - “Browse” implies viewing only
 - Customers are actively ordering from the page
 - Proposed alternative:
 - Rename “Browse” to “Menu” for customer-facing navigation
-

6. Navigation Refinements

- Team discussed reducing redundancy between:
 - Navigation-bar links
 - Dropdown-menu links
 - Agreed approach:
 - Frequently used pages remain on navbar
 - Profile/settings-related pages move into dropdown menu
 - Team agreed this would:
 - Reduce clutter
 - Improve mobile responsiveness
 - Create a cleaner user experience
-

7. Tutorial / FAQ Feature

- Team discussed implementing onboarding/tutorial functionality for first-time users

- Proposed ideas included:
 - Guided walkthroughs
 - Pop-up tutorials
 - Help buttons
 - FAQ sections
 - Team concluded:
 - Full tutorials may not be necessary
 - A simple FAQ/help section would likely be more practical and less intrusive
-

8. Priority Board Review

- Team reviewed the Sprint 3 priority board and reorganized tasks into:
 - P0
 - P1
 - P2
 - Prioritized tasks included:
 - Cash payments
 - Notifications
 - Vendor order-history refresh
 - Customer order filtering
 - Email verification
 - Item price limits
 - Team noted:
 - Most remaining tasks were now considered important refinements
 - Few items remained low priority
-

9. Vendor Order History Improvements

- Team discussed improving vendor order-management pages by:

- Refreshing active orders daily
 - Moving completed transactions into order history/archive pages
 - Team agreed this would:
 - Reduce clutter
 - Improve vendor workflow
 - Simplify active order management
-

10. Analytics Export Functionality

- Yusra was asked to create GitHub issues for:
 - CSV export functionality
 - PDF export functionality
 - Team agreed analytics exports would improve vendor usability and reporting
-

11. Logo Review & Branding

- Yusra presented multiple CampusBites logo concepts to the team
 - Team reviewed and discussed:
 - Color usage
 - Branding consistency
 - Icon integration
 - Team selected the third logo concept as the preferred option
 - Suggested refinements included:
 - Replacing the “I” with a fork icon
 - Incorporating orange branding accents
 - Team agreed the logo better reflected the food-delivery identity of the platform
-

12. UI Theme & Branding Updates

- Yusra proposed updating the UI styling to match the finalized logo branding
- Planned refinements included:

- Introducing orange accents into the interface
 - Updating navbar colours
 - Improving visual consistency across pages
 - Team agreed the updates should happen after major PRs were merged to avoid conflicts
-

13. Sprint Deadlines & PR Coordination

- Team discussed internal deadlines:
 - Friday/Saturday:
 - Development completion
 - PR merging
 - Saturday evening:
 - Group review session
 - Final PR approvals
 - Issue cleanup
 - Team agreed outstanding PRs should ideally be merged before midnight
-

14. External Feedback Planning (“The Bomb 2.0”)

- Team discussed showing the latest version of CampusBites to an external unbiased tester referred to as “The Bomb”
 - Purpose:
 - Gather honest usability feedback
 - Identify overlooked UX issues
 - Improve overall user experience before final submission
 - Shazmeen agreed to demonstrate the latest deployed version later that evening
 - Team reminded members:
 - Use the Vercel deployment link because payment integration only worked correctly there
-

15. Meeting Scheduling

- Team agreed the next major review meeting would take place on Saturday at 19:00
 - Purpose of the meeting:
 - Review all merged PRs
 - Finalize outstanding issues
 - Prepare for presentation readiness
-

Decisions Made

- Cash payment support will be added alongside online payments
 - Customer “Browse” page may be renamed to “Menu”
 - Navigation bars will prioritize commonly used pages while profile/settings pages move into dropdown menus
 - FAQ/help functionality preferred over intrusive onboarding tutorials
 - Third logo concept selected as preferred branding direction
 - UI theme updates will follow major PR merges
 - External usability feedback (“The Bomb 2.0”) will be collected before final submission
 - Saturday evening reserved for final PR reviews and issue cleanup
-

Next Steps

- Add cash-payment workflow
- Fix customer profile image upload issue
- Continue vendor-profile improvements
- Finalize navigation dropdown implementation
- Create analytics export issues
- Merge outstanding PRs
- Demonstrate latest deployed version to external tester (“The Bomb”)
- Prepare for Saturday review meeting
