

Code Blooded

Sprint Two

Sprint Review

What was demonstrated

- Vendor order status functionality (view and update orders)
- Integration with Firestore for order storage and updates
- Improvements to login and forgot password testing
- Increased Jest test coverage
- Continued work on documentation

Product Owner Feedback

- Overall positive feedback on the system
- Dropdown for quantity instead of clicking
- Restrict uploads to JPG, PNG and images for vendors
- Prevent negative values for prices
- Consider restrictions and limitations for quantity, dates and values
- Add password confirmation (enter password twice)

System & Design Feedback

- Class diagram: include correct symbols (+ / -) and data types
- Component diagram needs further work
- Development diagram should include hosting, static web app, and database
- No Git/CI outlines currently shown
- Use versioning for deployments (e.g. v1.2)

Questions / Considerations

- Payment functionality (including possible split transactions)
- Collection-only system
- Define own user stories
