

Sprint 3 Meeting Nine Minutes

Platform: Online (Teams)

Date: 02-05-2026

Time: 17:05

Attendees

- Shazmeen
 - Phelelani
 - Keanu
 - Yusra
 - Mika
-

Discussion Points

1. Notifications Feature Discussion

- Keanu asked whether notification functionality had been implemented
 - Team confirmed notifications were not yet part of the current sprint requirements
 - Phelelani stated notifications would likely be handled in a future sprint
 - Keanu suggested creating an issue to ensure the feature is not forgotten later
-

2. Vendor Dashboard Development Coordination

- Shazmeen planned to begin work on vendor dashboard improvements
 - Yusra confirmed she was currently working on related dashboard and browse files
 - Team agreed to coordinate changes carefully to avoid merge conflicts
 - Yusra was waiting for latest PR approvals before continuing her updates
-

3. Payment System Testing Challenges

- Yusra experienced issues testing order timestamps because payments could not be completed through Live Server

- Keanu explained payment functionality requires deployed Vercel environments rather than local Live Server testing
 - Keanu offered to add team members to deployment environments for easier testing
 - Team agreed deployed environments would simplify Firebase testing and order verification
-

4. Pull Request Review and Live Demo

- Team discussed reviewing and approving the currently open PR during the meeting
 - Phelelani requested a live demonstration before approval
 - Keanu demonstrated the updated functionality successfully
 - Team reviewed:
 - Featured vendors section
 - Vendor page linking
 - Browse-page improvements
 - Max-price filtering functionality
 - Vendor location visibility on menu items
 - PR functionality was confirmed as working correctly
-

5. Browse Page Refinements

- Team discussed additional improvements to browse-page filtering and search experience
 - Phelelani suggested:
 - Adding location-based filtering for East/West campus convenience
 - Improving the “0 items found” display with centred text and magnifying-glass icon
 - Team agreed current filtering system still required refinement and UX improvements
-

6. Cancel Order Feature Demonstration

- Team tested cancel-order functionality during the meeting
 - Mika confirmed cancelling an order currently changes status to “Cancelled” only
 - Refund handling had not yet been integrated into the payment system
 - Team reviewed behaviour for orders in different statuses
 - Phelelani highlighted that cancelling should not be allowed once an order is preparing
-

7. Refund Integration Planning

- Keanu confirmed refund processing work was still in progress
 - Refund functionality expected to be completed after integrating payment logic
 - Team agreed refund handling could continue separately from basic cancellation features
-

8. UML Diagram Progress

- Phelelani completed Sprint 2 UML diagrams
 - Work had started on Sprint 3 UML diagrams
 - Team noted UML work was becoming increasingly complex as the system expanded
-

9. Sprint Scheduling and Meetings

- Team agreed to skip the following day’s meeting due to Software Design test preparation
 - Planned to resume meetings online after the assessment
 - Members preferred online meetings after tests rather than in-person discussions
-

10. Admin Approval Workflow for Vendor Items

- Phelelani revisited the proposed admin approval system for newly added vendor items

- Planned workflow:
 - Vendors submit items
 - Admin reviews item details
 - Admin approves or rejects items before they appear publicly
 - Team agreed this should be tracked as a future refinement issue
-

11. Sprint Completion Planning

- Keanu suggested the team should avoid adding major new features during the final sprint week
 - Team agreed remaining work should focus on:
 - Finalising existing features
 - Refinements
 - Compatibility improvements
 - Bug fixing
 - Mobile responsiveness was highlighted as an important remaining refinement task
-

12. Logo and Branding Discussion

- Phelelani asked Yusra for updates regarding the project logo
 - Yusra confirmed logo work would begin after the Software Design test
 - Team invited suggestions for logo design ideas and branding direction
-

13. Vendor Navigation and Browse Improvements

- Team discussed redirecting users directly to vendor profiles when clicking vendor cards
- Current functionality was redirecting incorrectly to the homepage
- Team agreed this should be added under refinement tasks
- Additional refinement ideas included:
 - Toast messages when adding menu items

- Improved vendor navigation
 - Better browse-page interactions
-

14. Timestamp and Order Display Improvements

- Yusra continued work on timestamp functionality
 - Phelelani requested adding visible order numbers to the orders page
 - Team agreed order tracking details would improve clarity and user experience
-

Decisions Made

- Notifications will be handled in a future sprint
 - Current PR approved after successful live demonstration
 - Refund handling remains separate from basic cancellation logic
 - Team will avoid introducing major new features in the final sprint week
 - Mobile responsiveness and UI refinements remain important priorities
 - Vendor item approval workflow will be tracked as a future enhancement
-

Next Steps

- Continue timestamp implementation and testing
 - Complete refund integration with payment system
 - Finalise Sprint 3 UML diagrams
 - Improve browse-page filtering and empty-state displays
 - Add vendor profile navigation fixes
 - Begin logo and branding work after SD test
 - Improve mobile compatibility and UI consistency
 - Create issues for refinement tasks and future features
-

Key Takeaway

This daily scrum focused on reviewing recent browse-page and vendor-navigation improvements while continuing payment-system integration and cancellation functionality work. The team also began shifting focus toward refinement, usability, responsiveness, and sprint finalisation planning ahead of the final development phase.
